

V2 Aero All-Terrain Roller Skis

V2's American-made Aero XL roller skis are #1 in safety and ride comfort. Their 5 or 6-inch inflatable rubber tires plus adjustable speed reducers and emergency brake let you ski smoothly up and down hills, on smooth and rough pavement, on packed dirt and gravel roads, crushed stone bicycle paths, and cinder-surfaced railbeds. Long-lasting, durable air-filled tires cushion you against road vibrations and maximize the 'on-snow' feel. Models include XL150S and XL125S skate skis, XL125RC classic ski, and XL150SC 'combi' ski.

XL150S skate ski (*below*) is our most popular model. It supports the widest range of skier weights and can be used on both paved and unpaved surfaces. XL150S tires and tubes last longer and don't need to be pumped up as often as the XL125S.

XL150S with brake and speed reducer

XL125S skate ski (*below*) is recommended for lighter-weight skiers who ski on a mix of smooth and rough pavement. The XL125S can be converted into an XL150S simply by changing the wheels and re-calibrating the speed reducers and brake.

XL125S with brake and speed reducer

XL speed reducers apply pressure to your front wheels to control your speed on downhills - or to increase the intensity of your workout.

V2 XL125RC 3-wheel classic roller skis (*below*) are the most stable of all, due to their tricycle-style wheel layout, while their inflatable tires offer maximum versatility and safety on a wide range of terrain.

V2 high-pressure pump (left) permits precision inflation of 5 and 6-inch tires and prolongs the life of the valve stems (which may be damaged if bicycle pumps or air compressors are used).

XL emergency brake helps you stop quickly when you need to. Simply slide one ski forward and tilt your ankle back. The back of your leg will push the brake down onto the rear wheel.

V2 Aero roller skis are custom-assembled to your specifications, with precision mounting of Rottefella NNN, Salomon Pilot or Salomon Profil bindings, plus your choice of speed reducers, emergency brake and/or outrigger wheels. We also offer complete packages including boots, poles and a free instructional DVD. Worldwide shipping is available.

Cross-Country Skis – Ice Skates – Roller Skis
